## Prepare Yourself.

# Become a Certified Business Continuity Auditor/Lead Auditor

This workshop covers relevant standards, laws and regulations, the process of risk assessment, vulnerability analysis, loss prevention, risk mitigation, and the development, implementation, testing and maintenance of emergency management and business continuity plans and procedures. Course materials delve into existing legal and regulatory requirements, as well as standards including IX-110-53 (PS-Prep), NFPA-1600 and BS-25999.

Upon completion of this workshop and passing the unique qualifying exam, participants will be able to apply for either Auditor or Lead Auditor designation based on practical experience.

### CBCA CERTIFIED BUSINESS CONTINUITY AUDITOR

### CBCLA CERTIFIED BUSINESS CONTINUITY LEAD AUDITOR

There are no prerequisites required for taking this course and subsequent exam. If you are already certified, these are unique certifications and may be held together with your existing DRI International certification(s).
