“Leveraging the latest technology for business recovery and the ISO22313 implementation guidance”

DRI Expert Talk and Networking Evening with IBM

Leveraging the latest technology for Business Continuity and Disaster Recovery

Protect Critical Infrastructure and Human Capital

Dr Wong Kim Poh, Consultant, Business Continuity and Resiliency Services, IBM

To protect your business against disaster, you need a tested, cost-effective recovery plan that reduces your exposure during downtime and empowers you to respond with speed and agility to resume business operations as quickly as possible.

Effective Crisis Communications

Mr Andrew Fry, VP Asia, Whispir

Managing complex communications processes quickly and efficiently during a crisis has been a common inhibitor to the successful execution of even the best laid business continuity plans. In this session, we'll look at practical ways to improve response plans and corporate communications.

ISO 22313 BCMS Societal security — Business Continuity Management Systems — Guidance **Mr Clifford Seow, DRI Professional**

The standard offers global best practice to organisations aiming to implement effective Business Continuity Management System. It acts as a guidance document for ISO 22301 and is a key milestone to support the uptake and implementation of effective BCM worldwide.
